Summary

I am a motivated and detail-oriented Full Stack Developer with strong proficiency in Java, Python, and SQL. I have hands-on experience in building scalable backend systems, managing relational databases, and working with server-side technologies. I am eager to contribute to dynamic and innovative projects through an entry-level role where I can apply my technical skills and problem-solving abilities. My commitment to continuous learning allows me to stay current with evolving technologies and industry trends, ensuring that I deliver efficient, modern, and maintainable solutions.
