PROFESSIONAL EXPERIENCE

EDELTA CORPORATION

July 2025 - Present

Full Stack Developer

- Engineered full stack solutions for multiple client projects including blog applications, admin panels, and AI model testing platforms, resulting in enhanced system functionality and user engagement.
- Developed Ask-PDF application enabling users to upload PDF documents and interact with content using multiple AI models, streamlining document analysis workflows.
- Built scalable web applications using modern tech stack including React.js, Next.js, Node.js, and MongoDB, ensuring optimal performance and maintainability.
- Created comprehensive blog platform with full CRUD operations allowing users to publish, edit, and manage unlimited blog posts with MongoDB database integration.
- Designed and implemented admin panels and model testing interfaces for clients to validate AI-trained models efficiently.
- Recognized as Best Employee of the Month for exceptional performance and contribution to company projects.

TECH STACK

Programming Languages: JavaScript, TypeScript, Python, Java

Frontend Development: React.js, Next.js, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend Development: Node.js, Express.js, NestJS, Socket.io, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB

Architecture Patterns: MVC, MVP, MVVM, Bloc, RESTful API Development

Other: AWS, Git, GenAI, Object-Oriented Programming (OOP)

PROJECTS

Ask-PDF Application

Full Stack Developer

Tech Stack: React.js, Node.js, Python, AI Models Integration, MongoDB

Description: An intelligent document interaction platform allowing users to upload PDFs and query content using multiple AI models.

- Engineered PDF parsing and AI model integration for natural language querying of document content.
- Implemented multi-model support enabling users to switch between different AI engines for optimal results.
- Live URL: ask-pdf.edeltacorp.com

AI Model Tester Platform

Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, Python, MongoDB

Description: A comprehensive platform for uploading, managing, and testing Python-trained AI models including STT (Speech-to-Text), TTS (Text-to-Speech), and LLM models.

- Developed admin panel allowing users to upload and manage multiple AI models across different categories (STT, TTS, LLM).
- Engineered frontend testing interface enabling users to interact with and validate multiple models within each category.
- Implemented model switching functionality allowing seamless comparison between different AI models in real-time.
- Integrated Python-based AI models with Node.js backend for efficient model serving and testing.

Blog Platform

Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, MongoDB, RESTful APIs

Description: A comprehensive blogging platform with full content management capabilities.

- Built complete CRUD functionality allowing users to create, publish, edit, and delete unlimited blog posts.
- Implemented user authentication and authorization for secure content management.
- Designed responsive UI ensuring optimal user experience across all devices.

Additional Projects: Admin Panels, AI Model Testing Platforms, Company Websites

EDUCATION

SDJ International College

August 2022 - May 2025

Bachelor of Computer Application
