PROFESSIONAL EXPERIENCE

EDELTA CORPORATION

April 2025 - Present

Full Stack Developer

- Built and deployed Ask-PDF, an AI-powered document platform enabling users to query PDFs using multiple AI models — live at ask-pdf.edeltacorp.com.
- Developed WhatsApp Broadcast web app for bulk messaging, contact management, and real-time campaign tracking.
- Engineered AI Model Tester Platform supporting STT, TTS, and LLM model uploads and real-time comparison testing.
- Delivered multiple admin panels and company websites using ReactJS, NodeJS, and Supabase/PostgreSQL.
- Recognized as **Best Employee of the Month** for exceptional performance.

TECH STACK

Programming Languages: JavaScript, TypeScript, Python, Java
Frontend Development: ReactJS, NextJS, React Native, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend Development: NodeJS, Express.js, Socket.io, Spring Boot
Databases: PostgreSQL (Supabase), MySQL, MongoDB
Other: AWS, Git, GenAI, Object-Oriented Programming (OOP)

PROJECTS

Ask-PDF Application

ask-pdf.edeltacorp.com ↗

Tech Stack: ReactJS, NodeJS, Python, AI Models Integration, MongoDB
Description: An intelligent document interaction platform allowing users to upload PDFs and query content using multiple AI models.

- Engineered PDF parsing and AI model integration for natural language querying of document content.
- Implemented multi-model support enabling users to switch between different AI engines for optimal results.

WhatsApp Broadcast

wb.edeltacorp.com ↗

Tech Stack: ReactJS, NodeJS, Express.js, Supabase/PostgreSQL, WhatsApp API
Description: A web application enabling businesses to send bulk WhatsApp messages, manage contacts, and track broadcast campaigns.

- Built bulk messaging system with contact management, campaign tracking, and real-time delivery updates.
- Designed intuitive dashboard UI for managing broadcasts, templates, and audience segmentation.

AI Model Tester Platform

Tech Stack: ReactJS, NodeJS, Express.js, Python, MongoDB
Description: A platform for uploading, managing, and testing Python-trained AI models including STT, TTS, and LLM models.

- Built admin panel for uploading and managing STT, TTS, and LLM models with real-time comparison testing.
- Implemented model switching functionality for seamless comparison between different AI models.

Additional Projects: Admin Panels, Company Websites, [Dr.Fix Family](#) — Mobile app (React Native)

EDUCATION

SDJ International College

August 2022 - May 2025

Bachelor of Computer Application

CERTIFICATIONS

[Building Modern Projects with React](#) - LinkedIn Learning
Java Backend Developer - Add Zero Group
Anthropic Claude AI Skills Course - Anthropic

PERSONAL PROJECTS

- [Portfolio](#) (ReactJS, Tailwind CSS, NodeJS)
- [Seva Auto Sales](#) (ReactJS, NodeJS, Tailwind CSS)
- [Seva Invoice Generator](#) — Personal invoice generator web app (ReactJS, NextJS, Tailwind CSS)
- [Nindra](#) — Sleep cycle tracker for logging hours, monitoring patterns & health insights (ReactJS, NodeJS, Supabase/PostgreSQL)
- [Statement Analyzer](#) — AI-powered tool to detect wasteful spending & suggest expense reductions from bank statements (ReactJS, NodeJS, Third-Party AI API, Supabase/PostgreSQL)
